#### **DETAILED ACTION**

## Acknowledgment

1. This Office Action is responsive to the Amendment filed on 2/21/2007.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty défined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-14 and 17-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Bauer et al (US 2004/0028189).

Regarding claims 1-6, 9, 10, 17, and 20-23, Bauer, as shown in figures 1-4, teaches a method for identifying a service affecting the condition of the ADSL network between the modems located at the central office and remote site wherein the service affecting the condition is identified based on the combination of the characteristics of the subscriber and the information communicated between the modems. See also paragraphs [0019], [0021], [0050] – [0057], [0071] – [0078], [0089] and [0090].

Regarding claims 7, 8, 18 and 19, Bauer further teaches measuring the length of the line. See [0052].

Art Unit: 2611

Regarding claims 11-14, Bauer further teaches reporting the test results. See [0049], [0063], and [0064].

### Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 15, 16 and 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bauer et al (US 2004/0028189) in view of Sanderson (US 6,292,468).

Regarding claims 15, 16, and 24-27, Bauer teaches all subject matter claimed except for particularly using tones testing. Bauer only mentions that measuring attenuation at a plurality of frequencies might be included. See explanation of section 3 above and Bauer: paragraph [0056]. However, Sanderson, from the same field of endeavor, teaches testing ADSL using tones techniques as claimed. See Sanderson: column 3, lines 6-65. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Bauer et al by employing the tone testing technique as taught by Sanderson since Bauer also suggests testing at a plurality of frequencies.

Art Unit: 2611

### Response to Arguments

6. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference Duvaut et al (US 2003/0108095) is cited because it is pertinent to the method and apparatus for testing DSL.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DON N. VO whose telephone number is (571) 272-3018. The examiner can normally be reached on Mon-Fri (9:00AM 6:00PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAY PATEL can be reached on (571) 272-2988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
